DID YOU KNOW YOUR ENERGY SAVINGS BY GOING ON PEAK CONTROL MAY PAY FOR YOUR BACKUP GENERATOR?

Located in Eden Prairie, MN, US Power & Environment has provided load curtailment services for dozens of companies across the Nation with tremendous results.

Please sign the below and return via fax and we will run our utility-approved program to determine your energy savings by installing a generator and using it for Peak Control. Not only may your energy savings offset the costs of this capital investment in just MONTHS, but you can and your customers can benefit from uninterrupted power 7 days per week, 365 days per year.

In return, if you qualify, we will send you a quote for the appropriately sized generator, transfer switch, installation, and annual service contract, detailing your load characteristics and the offsetting energy rebates and savings, within 5 business days. We will arrange to discuss our findings with you at your convenience.
